

Brownfields 2013 Cleanup Grant Fact Sheet

Moscow Urban Renewal Agency, ID

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$115,317 for hazardous substances

EPA has selected the Moscow Urban Renewal Agency for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Sixth and Jackson property at 217 and 317 West Sixth Street in the City of Moscow. The site's past use as a bulk storage facility for agricultural chemicals has resulted in contamination from metals, pentachlorophenol, and pesticides. Grant funds also will be used to conduct community involvement activities.
